

App Development – Week 02 Minor Project

Topic

Personal Portfolio App

Focused Areas

- Flutter UI Development
- Layout Design
- Navigation
- Widgets and Components
- Responsive Mobile Design
- Dart Programming

Dear Students,

As part of your Week 02 learning activities, you are required to complete the **Minor Project: Personal Portfolio App**. This project is designed to help you build a professional mobile application while learning how to create structured layouts, navigate between screens, and present information effectively using Flutter.

Please ensure that your project is completed and submitted before the specified deadline.

What is Expected from You

Create a **Personal Portfolio Mobile Application** that showcases your profile, skills, projects, and contact information in a visually appealing manner.

The application should act as a digital portfolio that can be shared with potential employers, clients, or collaborators.

Features Required

1. Home Screen

- Profile picture
- Name and professional title
- Short introduction
- Navigation to other sections

2. About Me Screen

- Personal background
- Educational qualifications
- Career objectives
- Interests and hobbies

3. Skills Screen

- Technical skills
- Soft skills
- Tools and technologies known
- Skill ratings or progress indicators (optional)

4. Projects Screen

- List of projects completed
- Project title
- Project description
- Technologies used
- Project screenshots (optional)

5. Contact Screen

- Email address
- Phone number (optional)
- LinkedIn profile
- GitHub profile

- Social media links (optional)

6. Navigation

- Bottom Navigation Bar, Drawer, or Tab Navigation
- Smooth navigation between screens

Technical Requirements

Flutter Concepts to Demonstrate

- Stateless Widgets
- Stateful Widgets
- Navigation and Routing
- Layout Widgets
- Lists and Cards
- Image Widgets
- User Interface Design

Dart Concepts to Demonstrate

- Variables
- Functions
- Lists
- Classes and Objects
- Data Handling

Additional Requirements

- Design a professional and attractive UI.
- Ensure the application is mobile responsive.
- Use reusable widgets wherever possible.
- Organize code into separate files and folders.
- Upload the project to GitHub.
- Include a README file containing:
 - Project Overview

- Features Implemented
- Technologies Used
- Installation Steps
- Screenshots of the Application

Project Structure

Recommended structure:

- lib/
 - screens/
 - widgets/
 - models/
 - assets/
 - main.dart

Submission Format

Students must submit their project before the given deadline.

Submission can be done using:

- GitHub Repository Link
- Google Colab Link (if applicable)

The submitted link should be accessible and properly organized.

Submission Procedure

1. Login to your account.
2. Go to **My Course**.
3. Click on **Main Program**.
4. Select **Modules**.
5. Click on the **Minor Project** module.
6. Select **Minor Project 02** and go through the project topic.
7. Open the **Minor Project Submission Link** folder.

8. Submit the GitHub/Google Colab link in the provided Google Form before the deadline.

Evaluation Criteria

- Flutter UI Design
- Navigation Implementation
- Screen Organization
- Code Structure and Reusability
- User Experience
- Responsiveness
- GitHub Repository Structure
- Documentation Quality

Bonus Features

- Dark Mode Support
- Animations and Transitions
- Download Resume Feature
- Project Detail Screens
- Social Media Integration

Note: Late submissions may not be accepted without prior approval.

Complete the project independently and ensure that your submission demonstrates your understanding of Flutter UI development, navigation, and mobile application design concepts covered in Week 02.

Deadline: Submit before the specified due date on the LMS.

Best of Luck!
