

App Development – Week 01 Minor Project

Topic

Smart Quiz App

Focused Areas

- Mobile App Development Fundamentals
- Dart Programming Basics
- Flutter Widgets
- Navigation
- State Management Basics
- UI Design

Dear Students,

As part of your Week 01 learning activities, you are required to complete the **Minor Project: Smart Quiz App**. This project is designed to help you understand the fundamentals of mobile app development, user interaction, navigation, and state management while building an engaging quiz application.

Please ensure that your project is completed and submitted before the specified deadline.

What is Expected from You

Create a **Smart Quiz App** that allows users to answer multiple-choice questions and view their final score.

The application should provide an interactive and user-friendly quiz experience.

Features Required

RIVOQUIX LEARNING PRIVATE LIMITED
Hustlehub Tech Park,
Somasundarapalya Main Rd, adjacent
27th Main Road, Sector 2 hsr layout,
Karnataka 560102

@UnloxAcademy

1. Welcome Screen

- App title
- Brief description
- Start Quiz button

2. Quiz Screen

- Display questions one at a time
- Multiple-choice answer options
- Allow users to select an answer
- Next Question button

3. Score Calculation

- Track correct answers
- Calculate final score automatically

4. Results Screen

- Display total score
- Show number of correct answers
- Show number of incorrect answers
- Restart Quiz option

5. User Interface

- Clean and attractive design
- Easy navigation between screens
- Responsive layout

Technical Requirements

Flutter Concepts to Demonstrate

- Stateless Widgets
- Stateful Widgets
- Navigation

- Layout Widgets
- User Input Handling
- State Management using setState()

Dart Concepts to Demonstrate

- Variables
- Functions
- Lists
- Conditional Statements
- Loops
- Classes and Objects (Optional)

Additional Requirements

- Include at least 10 quiz questions.
- Use proper widget hierarchy and code organization.
- Maintain clean and readable code.
- Follow Flutter project structure best practices.
- Upload the project to GitHub.
- Include a README file containing:
 - Project Overview
 - Features Implemented
 - Technologies Used
 - Installation Steps
 - Screenshots of the Application

Project Structure

Recommended structure:

- lib/
 - screens/
 - widgets/
 - models/
 - data/

- main.dart

Submission Format

Students must submit their project before the given deadline.

Submission can be done using:

- GitHub Repository Link
- Google Colab Link (if applicable)

The submitted link should be accessible and properly organized.

Submission Procedure

1. Login to your account.
2. Go to **My Course**.
3. Click on **Main Program**.
4. Select **Modules**.
5. Click on the **Minor Project** module.
6. Select **Minor Project 01** and go through the project topic.
7. Open the **Minor Project Submission Link** folder.
8. Submit the GitHub/Google Colab link in the provided Google Form before the deadline.

Evaluation Criteria

- Flutter Widget Usage
- App Navigation
- Quiz Functionality
- Score Calculation Logic
- UI/UX Design
- Code Organization
- Responsiveness
- GitHub Repository Structure
- Documentation Quality

Bonus Features

- Timer for each question
- Randomized questions
- Category-based quizzes
- High-score tracking
- Dark Mode

Note: Late submissions may not be accepted without prior approval.

Complete the project independently and ensure that your submission demonstrates your understanding of Flutter fundamentals, Dart programming concepts, and mobile application development covered in Week 01.

Deadline: Submit before the specified due date on the LMS.

Best of Luck!
